

Regulations

Indiana livestock farms regulated by various county, state and federal agencies. Here's the a list of the primary regulatory groups:

Indiana Department of Environmental Management (IDEM)

The Indiana Department of Environmental Management (IDEM) is the state agency charged with the responsibility of regulating Indiana's confined livestock feeding operations.

- General permitting information on Confined Feeding Operations (CFOs)
- Difference between a CFO and CAFO
- Permits Issued in the Last Month (CFO & CAFO)
- Pending Permits (CFO & CAFO)
- Understanding the IDEM Appeals Process
- Farmer's IDEM Checklist
- Sample Questions Asked At IDEM Public Information Meeting on CAFO/CFO Permit Applicant
-
- Livestock Production Complaints Received by IDEM in 2006
- IDEM Environmental Enforcement Actions Searchable Database
- Want to know how many and the types of environmental violations and

enforcement actions have taken place in your county? The Indiana Department of Environmental Management (IDEM) has a searchable database showing IDEM enforcement actions for the last ten years. Each month, the Office of Enforcement publishes a list of enforcement actions and orders that were finalized during the previous month. New documents are added on a cycle around the middle of the month.
